

## Here's what some of our employees have to say about Fulton Hogan:

*"I started working at Fulton Hogan in the summer break after finishing my second year of study at UNITEC. I initially worked on the Auckland City Council maintenance contract, then in the following year worked on surfacing sites doing quality assurance. Halfway through the second year I started as a full time Engineer on the Transit Maintenance contract and am completing the rest of my studies part time.*

*The main benefit to me from working before finishing my studies was that I gained a better understanding of what I had been taught in the classroom. It has also made learning new information easier. I have always been a practical learner and so it has been excellent to see the work being completed and have staff support around me who have practical knowledge and who are willing to help.*

*Fulton Hogan as a company is very accommodating towards staff learning as they work and this is clearly evident in their policies towards employee development."*

**Christian - Maintenance Engineer**

*"Fulton Hogan has given me a reliable and secure job with almost unlimited opportunities. Guided by a great management team and many friends, I have learnt valuable skills from surveying to public relations and management. At 18 years old I already manage jobs, act as a foreman, set out and draught surveys, all after only six months.*

*Fulton Hogan really look after you. There is always someone to help you out, point you in the right direction, and a friend to guide you on your way. With all these opportunities I won't be jumping ship any time soon. There is no end to what Fulton Hogan has to offer."*

**Hugh - Fulton Hogan Cadet**

## Don't worry if you don't have experience.

Fulton Hogan will train you if you are eager to learn, have a positive "can do" attitude, and are keen to build a career with the company.
